

Multimodal Connect: Europe-Asia Pac

Enhancing intercontinental connectivity

Shippers today are faced with unprecedented transit times, unreliable schedules and an increased demand to lower carbon emissions. Enter our **Multimodal Connect: Europe-Asia Pac**, a unique, reliable multimodal rail and sea end-to-end solution linking Europe with Asia Pacific via China.

With PSA's owned and managed railway stations and port facilities in strategic locations such as Chengdu, Chongqing and Qinzhou, and PSA BDP's NVOCC BDP Transport, we are well positioned to offer priority services, transloading, warehousing and ocean freight transportation to move your cargo between Europe and Asia Pacific via China.

Features

- Multimodal route linking Europe and Asia Pacific via China
- End-to-end supply chain orchestration
- In-house transloading
- Freight bookings, management, and visibility on PSA's digital supply chain platform, CALISTA™
- Terminal value-added services at PSA rail and sea ports

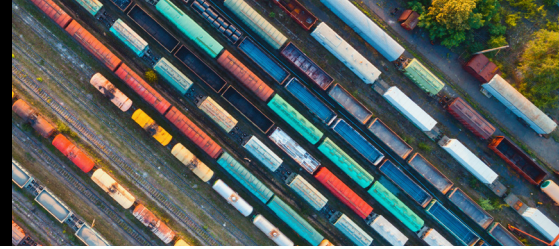

Core Services

- Pre-carriage & railway freight services at the following locations between Europe and China:
 - **Europe:** Lodz & Małaszewicze (Poland); Tilburg (the Netherlands); Duisburg (Germany); Mersin & Istanbul (Türkiye)
 - **China:** Chongqing; Chengdu
- Standard equipment: 40' High Cube Container
- Coordinate documentation, including receipt of bill of lading from shipper
- Free On Rail – Free On Rail (FORFOR) terms
- Cross-border procedures and rail gauge change at borders
- Daily status update

Optional Services

- First mile pick-up, last mile delivery
- Customs clearance
- Cargo consolidation
- Less than container load (LCL)
- Additional insurance coverage
- Issuance of house bill of lading
- Cold chain solutions
- Trade financing
- Multimodal (rail-ocean) service from Chongqing, Chengdu and Qinzhou (China), to North East Asia (Japan and South Korea), South East Asia and Oceania

Enhanced end-to-end supply chain orchestration

Whether it be an eastbound rail service from Europe to Asia Pacific via China or a westbound service from Asia Pacific to Europe via China, PSA BDP is your single point of contact to help you achieve enhanced intercontinental connectivity.

In addition to rail freight between Europe and China, we provide transloading services in Chongqing, Chengdu and Qinzhou as well as the connecting sea freight to/from Japan, South Korea, Southeast Asia and Oceania. We also offer trucking services from Vietnam to China for cross-border China Railway (CR) Express service to Europe.

To help you achieve a smoother cargo flow, you can request priority handling of your time-critical cargo at selected PSA-operated railway and port terminals in Qinzhou and railway terminals in Chongqing and Chengdu.

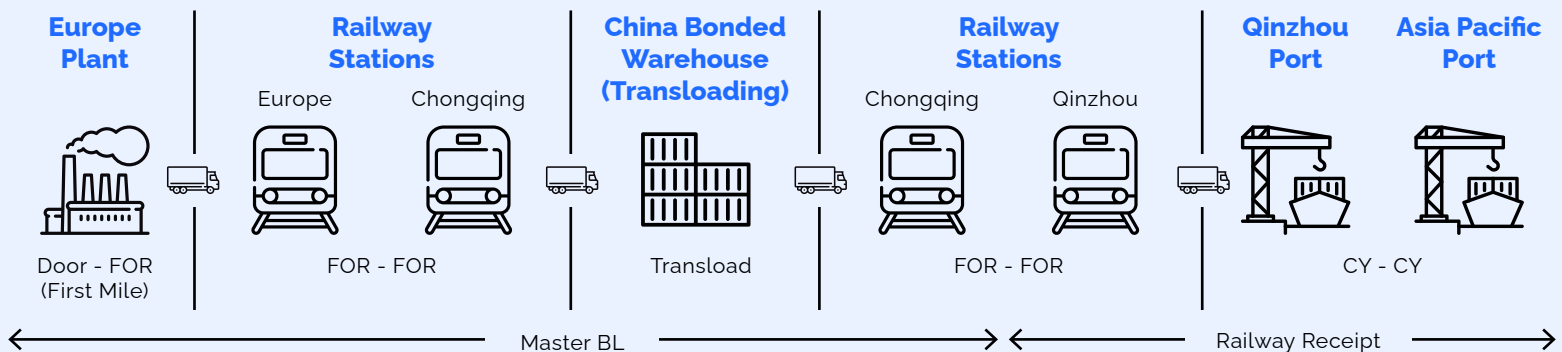

Delivering greater supply chain resiliency and agility:

- Enhanced end-to-end solution between Europe and Asia Pacific
- More cost-efficient and eco-friendly than air freight
- More reliable scheduling and quicker transit times than "all-sea" equivalents
- End-to-end supply chain visibility via CALISTA™
- Simplified customer experience orchestrated by PSA BDP experts

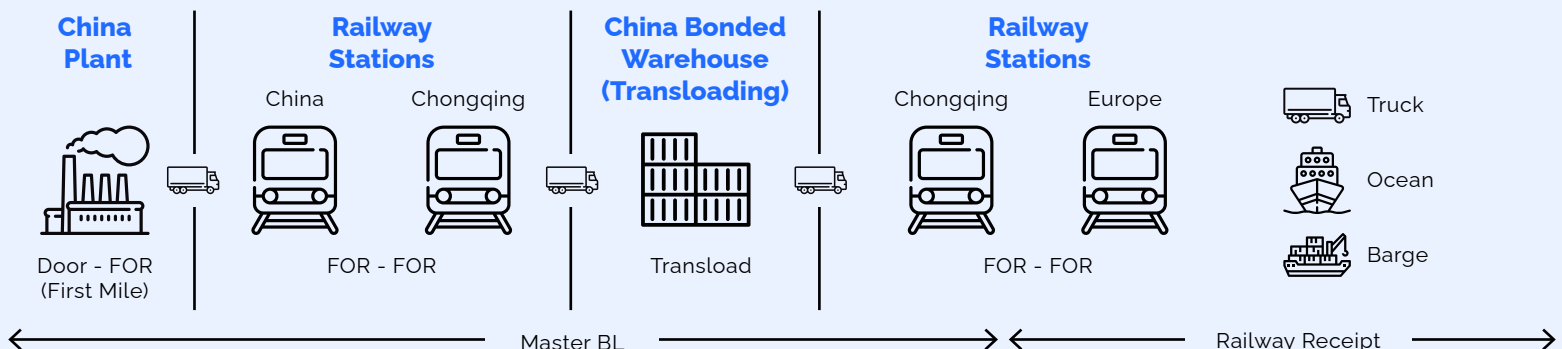

20x Lower Carbon Emissions

A customer in the FMCG industry was moving personal care products via air freight from Lodz, Poland to Ho Chi Minh, Vietnam and South Korea and was able to achieve 20x lower carbon emissions by switching to rail.

Eastbound

Westbound
